EXCURSIONS

There are many excursions to do for those who want to discover the beauty and hidden places of this part of Sardinia.

The Green Train

With the name "Trenino Verde" (Green Train) we refer to the tourist service of the State Railways. This train is set on a railway with narrow tracks and passes through a territory rich in vegetation. Numerous English operators programming their trips to Sardinia each year insert this suggestive attraction in their itineraries defining it "the train in the wilderness" to purposely underline the trip across a savage and uncontaminated wilderness, where the railway seems part of this landscape, together with the road mender's house, the stations, the viaducts, and all of the railway engineering artworks. The English also like to shout, before departing for their trip, "Don't fasten your seat belts!", emphasizing an other important aspect of this train ride, and that is the right speed to consent the appreciation of the island landscape in every aspect, while you proceed, gingerly, in an environment unreachable by other means. For the tourist the trip is the most enjoyable and stimulating moment of the day; but it is also an exceptional experience for the schools, due to its educational value and for the possibility of using the train as a special classroom on the railroad. Travel on this train is made possible by simply buying a ticket at the station of departure, in any authorized agency or directly on the train. The prices, the periods and the timetable in which the service is active are posted at the railroad stations or you can visit the sites www.treninoverde.com e www.ferroviesardegna.it.

Boats

The incomparable beauty of the emerald coast can be enjoyed through a trip by sea. There are countless services or chartering boats accompanying the tourists on the boats that allow you to see the most fascinating stretches of the coast.
